CONQUERING TOUGH COMPLIANCE CHALLENGES (Cont.)

Risk Visibility and Control

Trend Micro vulnerability and threat management solutions give you total risk visibility and remediation control over active threats, software and systems vulnerabilities, web content, and IT policy compliance.

End-to-End Vulnerability Management

Trend Micro solutions streamline, automate and manage the entire vulnerability management process from automated discovery to virtual patching/shielding and permanent patch deployment.

Website Protection

Trend Micro Enterprise Security keeps your website and company reputation secure with website application scanning, PCI scanning, best-in-class server protection, and comprehensive vulnerability management.

Mitigating Information Risk

Trend Micro secures sensitive data with a full range of data loss prevention and encryption solutions that emphasize security, management simplicity, and employee ease-of-use.

Desktop and Server Virtualization

Only Trend Micro server and endpoint solutions provide advanced virtualization-aware software that secures virtualized desktops and servers with best-in-class protection, optimized performance and critical compliance controls.

Public Cloud Computing

Only Trend Micro provides the secure virtual server and cloud data encryption solutions that allow you to confidently incorporate the public cloud into your datacenter strategy.

Large-Scale Distributed Environments

Trend Micro Deep Security provides firewall, IPS, integrity monitoring, and other core controls directly to critical host systems that process regulated data—eliminating the cost and management complexity of perimeter security devices at each location.

Hard-to-Secure Systems and Devices

Trend Micro's unique network-based Threat Management Services discovers any active infiltration, allowing you to achieve compliance and non-invasive protection for any endpoint or server, including legacy or proprietary devices.

COMPLIANCE WITHOUT SECURITY COMPROMISE

For security-driven organizations that want to truly protect their sensitive data and comply with regulatory requirements, Trend Micro Enterprise Security solutions, powered by the Trend Micro Smart Protection Network™, help you achieve compliance while delivering the best in enterprise security. That's compliance without compromise.

Customer Testimonials

“Switching to Trend Micro was the right move for our retail operation and has solved the problems created by our previous vendor.”

Follett Corporation

“We like to think of PCI as a baseline. We chose Trend Micro Deep Security because it helps us...do all we possibly can to safeguard credit card data.”

Noodles Restaurants

“We must go beyond simply meeting compliance requirements. Trend Micro Enterprise Security was extremely competitive and covered all our needs.”
